DETAILED ACTION

Claims 1-122 are rejected under 35 U.S.C. 112, second paragraph for undue multiplicity. Applicant presents 122 claims with 10 independent claims for essentially the same invention. That invention is relatively simple having no moving parts and being comprised of only 3 or 4 separate sections. The claims directed to the method of making the device are virtually the same as the structure claims. That many claims describing the relatively simple invention must necessarily be repetitious which is confirmed by the analysis thereof. The result of such repetition is to confuse rather than to clarify the invention. It is noted that applicant should be allowed some latitude to present claims of varying scope and phraseology in order to describe the invention. Such latitude should not be extended to allow that degree of multiplicity which obscures the definition of the invention however. The rule of reason should be applied to each case individually. In the instant case it is felt that 3 independent claims and 25 total claims would adequately describe the invention. Applicant should thus choose the claims that will be examined. See MPEP 2173.5(n).
